

DRESTER CLASSIC 1050 BY HEDSON

Manual spray gun cleaner with brush and high pressure rinse gun

Water-borne paints are considerably harder to remove from spray guns than conventional paints. Therefore, the Drester 1050 by Hedson has been supplied with a pre-wash brush and a rinse gun fed with recycled water. It includes an air blow gun for drying after cleaning and a quick connect whip line for blowing out the spray gun paint channel. It can also be equipped with a flush gun, enabling use with other rinsing water/solvent as often provided by the paint manufacturers.

- Low water consumption and recovery
- Powerful diaphragm pump
- Efficient filter system

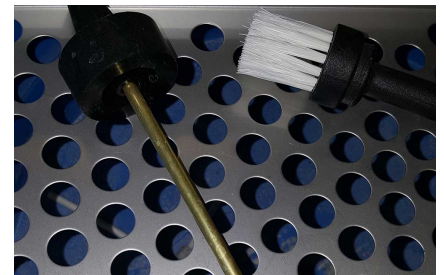

LOW WATERCONSUMPTION

Thanks to the effective cleaning and water reuse facility, water consumption is low and the environmental impact is reduced

AGITATED AUTOMATICALLY

The liquid is agitated automatically with air. After filtration the water can be reused or pumped out through the brush

EFFICIENCY

Manual clean rinse with venture nozzle and foot operated for hands-free operation. Complete manual gun cleaner - all you need in one unit for manual cleaning

TECHNICAL SPECIFICATION

Drester Classic 1050	Part.no. 1050 (standard unit)
Shipping dimensions	1 pcs on ½ pallet, 600*800 mm
Weight	21 kg
Air consumption	100 l/min (4 cfm)
Flow through brush	1,5-2 l/min
Air supply	5-12 bar (80-180 psi)
Liquid volume of machine	35 l
Height	1050 mm (41")
Diameter	Ø 590 mm (23")

CONSUMABLES

AQUASOLVE

Better cleaning performance, now with a new formula
Part.no. 230120

FILTERS GUN CLEANERS

Filters for better cleaning performance
Part.no. R8701
